Getting there

- 1) From Santa Caterina Valfurva:** Hotel Ghiacciaio dei Forni reachable by car (6 km transit for a fee) from Santa Caterina Valfurva. - **Starting elevation** 2178 m - **Altitude** 3485 m **Difference:** 1307 m **Time:** 4 hours and 30 min. - **Difficulties:** Mountaineering Little Difficult [PD+]

From [The Refuge Branca Cesare-Martinelli Luigi](#) 2493 m descend briefly on the little valley between the right-wing moraine of the glacier of Forni and the slopes of the mountain. Climb up to the end of the moraine until it ends and then divert to the left and go up in a detritic valley leading to the beginning of the glacier. Walk along the glacier in the direction of entering the basin below the Palon de la Mare. Continuing in the same direction you reach, the lower part of the W ridge of Palon de la Mare. For an easy icy ridge you descend towards N to the wide glacial saddle of the Col de la Mare. You continue to the ridge in the N direction that goes back to form the ridge S of the mountain Ròsole where the bivouac rises

- 2) From Cogolo to Val di Sole:** Cogolo-Malga Mare- **Starting elevation** 1970 m - **Altitude** 3485 m **Difference:** 1515 m **Time:** 5 ore and 30 min.- **Difficulties:** Hikers easy [E] up to the Refuge Larcher Not very difficult from the Refuge to the bivouac [PD]

From Cogolo take the road of the Valley of the sea and follow it to the car park of Malga Mare. Walk along the path SAT No. 102 Who, holding the left orographic side of the valley, arrives at the refuge. From [Refuge Cevedale-Guido Larcher](#) 2609 m You take the path to the Forcola Pass. You abandon (arrows) immediately to go down to the left and cross the stream before going up on the opposite side in the direction of the glacier. In the first section the path is quite easy and guided by the signs (white and red). You reach a little valley where until a few years ago descended the right branch (hydrographical left) of the glacier. You go up the little valley standing on the left (moving boulders) until you reach the vast upper hollow, partly abandoned by the glacier. You move to the left between piles and scree and you get to the glacier. You go to SW avoiding the numerous crevasses which are, for the most part, perpendicular to the direction of the route. Turn right to reach a second shelf and climb to Colle de La Mare.

Note

The path on glaciers of both routes may change year by year depending on the changing conditions of the glaciers.

Ask beforehand about the conditions!

Structure

Bed	9 beds with mattresses and blankets
Lighting	LED powered with photovoltaic panel/external emergency light
Power supply	USB socket for cell phone charger
Water	Melting nearby

Dear guest please **contribute** to the maintenance of this bivouac
